Start Date : 26 January

Why Join Us?

Live Classes, Fully Interactive:

Our sessions are not pre-recorded, so you have the opportunity to ask as many questions as you want and get real-time clarity.

Project Management is an in-demand skill, and we teach it in simple, practical ways that anyone can understand and apply

Mentorship & Career Support

Get guidance during and after the class, plus insights to build confidence and prepare for real opportunities.

Real-Life Experience

Learn through practical examples, live exercises, and hands-on projects that mirror real workplace scenarios - so you don't just study theory, you apply it.

Curriculum Overview

- 1. Introduction to Project Management:** A clear foundation on what project management is, why it matters, and the key roles involved.
- 2. Industries for Project Managers:** Explore the various industries where PMs work and how to choose a career path that fits you.
- 3. Introduction to the Project Life Cycle:** Learn how projects move from initiation to closure and the major activities in each phase.
- 4. Project Management Knowledge Areas:** Understand the core PM knowledge areas that guide effective project delivery.

5. Project Documentation: Step-by-step guidance on creating and managing essential project documents.

6. Identifying Risks, Managing Issues & Handling Change Requests: Practical techniques to anticipate problems, mitigate risks, and manage changes smoothly.

7. Project Management Methodologies & Best Practices: Breakdown of Waterfall, Agile, Hybrid, Lean, and how to choose the right approach.

8. Basics of Agile & Scrum + Modern Team Collaboration: Introduction to Agile principles, Scrum roles, ceremonies, and how modern teams operate.

9. Project Management Tools: Jira & ClickUp (Hands-On): Live demonstration of how to use PM tools to plan, track, and execute projects.

10. Why UI/UX Matters in Projects: Understand how design affects project outcomes, user satisfaction, and stakeholder alignment.

11. Understanding AI for Project Management: Learn how AI supports reporting, automation, tracking, and decision-making.

12. Understanding the Software Development Lifecycle (SDLC): A simple breakdown of how software is planned, built, tested, and delivered.
